CAREER OBJECTIVE

Aspiring Full-Stack Web Developer with hands-on experience building and deploying production-grade web applications. Proficient in Flask, REST APIs, and modern frontend technologies. Passionate about creating intuitive, scalable, and AI-integrated user experiences.

EDUCATION

Dr. B.C. Roy Engineering College

B.Tech in Computer Science and Design

Durgapur, India

Expected: 2027

Dhanbad Pranjivan Academy, Dhanbad

Passed High School with major in Science & Math (Grade - A)

Jharkhand, IN

Jul 2020 - Jul 2022

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+)

Backend: Flask, REST APIs, Socket Programming, Session Management

Database: MySQL, SQLite, MongoDB, PostgreSQL

Deployment & Tools: Render, Netlify, Git & GitHub, VS Code, Chrome DevTools

Concepts: OOP, DSA, User Authentication, Role-Based Access Control, Responsive UI/UX

PROJECTS

InterviewAce AI | *Flask, Python, Gemini/Groq API, SQLite, Render* | [Live](#)

- Built an AI-powered interview preparation platform with mock interviews and real-time LLM-generated feedback.
- Integrated Gemini/Groq APIs to generate role-specific questions and evaluate user responses intelligently.
- Implemented user authentication, response storage, and performance tracking using SQLite; deployed on Render.

CampusSync | *Flask, Python, MySQL/SQLite, HTML, CSS, JavaScript*

- Developed a centralized college platform for managing events, announcements, and student activities.
- Implemented user authentication, event registration, and role-based access control for students and organizers.
- Designed responsive dashboards with real-time updates; built REST APIs with MySQL/SQLite for data management.

InnerSpace AI | *Flask, Groq API, SQLite, Render* | [Live](#)

- Built and deployed a full-stack AI chat application with user authentication and persistent chat history.
- Integrated Groq LLM API for real-time responses; resolved production API auth errors and model deprecation.
- Configured Flask backend with session management and SQLite storage for production deployment on Render.

SMS Spam Detection | *Python, Flask, Scikit-learn, NLP, TF-IDF* | [Live](#)

- Built a TF-IDF + Naive Bayes classifier and deployed it as a Flask web app for real-time spam/ham predictions.
- Designed a clean, user-friendly interface for message submission and instant classification results.

Dezinova Club Website | *HTML, CSS, JavaScript, Tailwind CSS* | [Live](#) | *Collaborative*

- Developed a fully responsive departmental club website with interactive UI elements and an AI chatbot interface.
- Led full UI/UX design and responsive layout implementation; deployed on Netlify.
